
LEVEL 6

The lawn mower must get back to where it started.

- You are given a list of lawns.
  Each lawn has one tree on it.
- For each lawn, find a valid path.
- You can choose the start cell.
- **The end cell must be a neighbor of the start cell.**
  LD[illegible]
- Every given lawn is solvable.
  There are multiple correct solutions.

Input - **identical to previous level**

Name	Description	Example
N	Number of lawns	3 7 5 ....X.. 7 7 ....X. ..... 5 5 ..X.. ....
Repeated N times		
Lawn size	The width and height of the lawn	
Lawn	A paragraph of characters	

Output - **identical to previous level**

Name	Description	Example
Path (repeated N times)	A string of characters	SSSSDDDWDDSDWWWWAASDSAAASAWWDDWAA SSSSSSDDDDDDWWWWWWAASDSASDSASAWASAWWWWDSSDWWWAA SSSSDDDDWWWWASASDSAAWWW
