
Level 8

Houston, we have a problem

- **The asteroids now move as well**
- Asteroids start moving as soon as your sequence starts.
  However, your sequence starts with 0 while the asteroids already have a pace
- Multiple asteroids may be in the same place at the same time
- Asteroids do not collide with each other
- The time limit is short, but does not require an optimal solution

Input

Name		Description	Example
N		Number of cases	2 11,6 62 4 0,3,5,0 1,-19,5,1 5,-10,0,1 8,4,0,0 -10,-10 57 2 0,-10,-3,3 -10,0,3,-3
repeated N times	Space station and time limit		
	A	Number of asteroids	
	Asteroids	A list of asteroids separated by spaces Each asteroid consisting of X-position, Y-position, **X-pace** and **Y-pace** separated by a comma	

Output
