Subject: Manage variations

Due to our organizations commitment to flexibility and optimizing space utilization, desks at each CCC location may be of different sizes.

You'll need to manage these variations to ensure efficient use of the available space and meet our operational needs.

Reply Forward

- The used desk size can be chosen freely between 1 and 7
- Desk sizes may be mixed within a room
- **Place desks in a way so that they cover a given number of cells**
- The given number of cells is the maximum number that is possible.

Input

Name	Description	Example
N	Number of rooms	3 10 9 47 9 7 35 6 8 24
Room (repeated N times)	Three space separated integers representing a room First integer: x room length (min room length is 4) Second integer: y room length (min room length is 4) **Third integer: number of cells to cover**	

Output

Name	Description	Example
Room (repeated N times)	A matrix of integers, with y rows and x columns ‘X’ represents a desk ‘.’ represents no desk	*format identical to previous level* XXXXXX.X.X .....X.X XXXXXX.X.X .....X.X XXXXXX.X.X .....X.X XXXXXX.X.X ..... XXXXXX.XXX ...
